ANNUAL REPORT
July 1, 1973 - June 30, 1974

The Division of Immigration and Americanization completed its fifty-seventh year of service in fulfilling its function to bring into sympathetic and mutually helpful relations the Commonwealth and its residents of foreign origin. The Boston office and district offices (Fall River, Worcester, Springfield, and Lawrence) rendered a combined total of 41,658 services, to 20,423 individuals.

There was no action on the reorganization bill H.6160 filed in the Massachusetts legislature in 1973. It will be recalled, one of its provisions was to abolish this Division.

The Division will, in the very near future, provide employment and educational counselling to aliens under the direction of Dr. Joseph M. Cronin, Secretary of Educational Affairs and Richard M. Hailer, Assistant Secretary, as well as to take part in the effort to coordinate the ethnic heritage activities amongst the Bilingual-Bicultural program, Arts and Humanities Council, and community ethnic organizations. Senator Schweiker (R-Pa.) original sponsor of the Ethnic Heritage Studies Program, announced recently that the program has won a 4-year extension. It is anticipated there will be a broad spectrum of ethnically diverse activities and the Division will participate and cooperate with multiethnic projects. The Honorable Francis W. Sargent, Governor of Massachusetts, recently signed an Executive Order establishing a Task Force to make recommendations for enhancing the "existence and development of ethnic heritage programs, and achievements in the Commonwealth and elsewhere", in recognition of group identities in our pluralistic society. There is a resurgence of the unmeltable ethnics in the nation and their undeniable contributions to the nation are coming to the fore.

Ethnic Classifications

Our clients show 103 countries of birth for this fiscal year. Of those numbering over 1,000 the Portuguese lead the ethnic classification with 4932; Greece - 3695; United States - 3153; Italy - 2568; Poland - 2191; the Dominican Republic - 2141; Canada - 2014, Cuba - 1997, Jamaica - 1759 and China - 1152. However on the national level, the largest ethnic groups over 10,000 for fiscal year 1973, show the

following: Mexico - 70,141; Philippines - 30,799; Cuba - 24,147; Korea - 22,930; Italy - 22,151; China and Taiwan - 17,297; Dominican Republic - 13,921; India - 13,124; Greece - 10,751; Portugal - 10,060; United Kingdom - 10,638.

12,484 immigrants were destined to Massachusetts during fiscal year, 1973 and to other states as follows:

New York	93,626	New Jersey	25,236
California	85,062	Texas	26,619
Illinois	25,489	Florida	22,117

Under the Alien Registration Act, in January 1974, 180,531 aliens registered in Massachusetts. During the fiscal year 1973, 4,127,821 permanent residents reported under the Alien Address Program in the nation. The largest single alien groups were: Mexicans - 837,865; Cubans - 456,056; Canadians - 444,308, British - 330,378; Italians - 235,703; Germans - 198,577; Filipinos - 193,271; Chinese - 125,155.

On the national level for fiscal year, 1973, 166,108 new immigrants were admitted to the United States from the Eastern Hemisphere and 116,903 from the Western Hemisphere. These figures do not include the 100,953 immigrants classified as "immediate relatives", that is, spouses, children and parents of United States citizens and embraces both the Eastern and Western Hemisphere.

According to the census records, the population of Massachusetts is 5,688,903 and 494,680 are listed as foreign born. 1,397,064 are either foreign born or of mixed parentage so that one-third of the residents of Massachusetts have foreign backgrounds.

Legislation in Congress

H.R. 981, provides, amongst other things, that the Eastern and Western Hemisphere immigration systems (quotas) be equalized. H.R. 982 is a bill to impose sanctions on employers who knowingly employ aliens out of status. Both bills were filed by Rep. Peter Rodino and are now pending in the Senate judiciary committee. H.R. 981 is aimed at adjusting the quota - the Eastern Hemisphere (natives of Europe, Asia, Africa and Oceania) has a seven preference quota system and a nonpreference classification. The Western Hemisphere (Canada, Mexico, South and Central America, and most of the islands in the Caribbean) has no such preferences, and frequently a Western Hemisphere native who would return to his country

to marry, has to wait for his spouse over two years. Another bill in Congress is S.2643 introduced by Senator Kennedy, in 1973. It provides amongst other things, for the quota system to be equalized (Eastern and Western Hemisphere), and to make provision to adjust the status of aliens in the United States over three years in an illegal status. It is estimated there are over six million such persons in the United States. Canada appears to have a similar problem and is contemplating an "amnesty" to take care of such aliens. In this country also, we have had a Chinese confession program as far back as the 1950s, to encourage adjustment of status and provide administrative relief for aliens in the United States, who have over a period of years, settled here, had children born in this country and in many instances, had acquired property or a modest business, supporting their families. All the above bills are still pending in the 93rd Congress.

Refugees

The Division assisted 293 Cubans in adjusting their status, after arriving here under "parole" status, at least two years ago. The Cuban airlift program terminated in May, 1972. However, the program has been expanded to include Cubans from Spain, as many sought refuge in that country, since they were unable to enter the United States otherwise. Added to the waves of refugees from other countries, are Soviet Jews, and other members of Soviet minorities, paroled by the Attorney General into the United States, as well as Uganda Asians. Since World War II, to fiscal year 1973, 1,004,543 refugees were admitted to the United States. The largest number of refugees came from Cuba - 189,282; the next largest from Poland - 164,494. Other large numbers came from Germany - 100,224; Yugoslavia - 80,316; Hungary - 67,369; Italy - 62,684; and U.S.S.R., 45,353.

Citizenship

Citizenship applications continue on a high level with over 126,000 persons naturalized by the Federal and State courts in the nation, the highest number in the past ten years. The children, likewise, who derive citizenship through their parents, are issued citizenship certificates. 32,829 children obtained such certificates. Our Division assisted 2,057 persons with citizenship applications. To a great extent, people may be motivated in applying for citizenship to obtain

certain immigration benefits. A citizen of the United States may petition for his spouse, child or parents, according them an immediate relative non-quota status, thus eliminating quota restrictions and long waiting periods. Families are reunited much quicker, as usually the head of the family emigrates first, to try and establish himself, before sending for his family.

The Division assisted 640 persons in changing their status from visitors, students, or other non-immigrant categories, to permanent residents. Some were qualified to adjust their status before the federal immigration service in Boston; others, natives of Western Hemisphere, had immigrant visa applications, accepted by American Consuls abroad - a great deal of them at the American Consulate, Halifax, N.S., Canada. This involved preparing the visa documents, translations, and correspondence with American Consuls, before the applicant was given a visa appointment by the American Consul.

The Division continues to serve aliens and American citizens, cooperating with federal, public, and private agencies, schools, colleges, and industry. Foreign students from many parts of the world frequently call on the Division for assistance in immigration problems. The clergy also seek our assistance in sponsoring priests from abroad, to carry on their religious work here as do many convents sponsoring nuns from abroad, or help adjust the status of some already in this country.

REPORTS OF DISTRICT OFFICES

SPRINGFIELD

Our statistics indicate that 3,199 recorded services were performed for individuals who resided in four Western Counties of the State. These people came to us from forty-six communities in the area served in our office. We had contact with forty-nine former residents now living in other areas of our country.

Of the seventy-seven nationalities recorded this year, natives of the United States were the leading group followed by natives of Jamaica, Canada, Greece, Poland, Korea, Portugal, Germany and Great Britain. It is to be noted that over a thousand of our clients were natives of the Western Hemisphere.

As mentioned at the close of the fiscal year of 1973, our agency was greatly concerned and involved in the Reorganization Program of the Board of Higher Education which recommended that this Division be abolished. On August 2, 1973, this agent appeared at a public hearing at the University of Massachusetts and before the Legislative Committee on Education to register opposition to the proposal to abolish our agency under H. 6160. It can now be reported that the Legislature did not deem it advisable to discontinue the work of our Division.

The major portion of our work was devoted to the subject of Immigration. To those persons whose relatives required labor clearance, it is disheartening as jobs are unavailable. For these who have relatives in the Western Hemisphere, it was found discouraging, because although they may have been able to obtain the job certification, they were greatly disturbed upon learning that visas would not be available for twenty-eight to twenty-nine months. The majority expressed hope that the Congress may soon make a change in the preference system applicable to the Western Hemisphere.

Most of our adjustment cases dealt with the so-called overstays. These non-immigrants were natives of the Western Hemisphere who were admitted to the United States two or three years ago either as visitors or students. They had failed to extend their temporary stay in the United States. All of these cases were directed to us by the United States Immigration and Naturalization Service after they had been placed under Docket Control.

The handling of these cases is quite involved and time consuming for it generally requires several steps to be taken over a period of several months before the individual receives an invitation to appear before the appropriate United States Consulate abroad.

During the year we had numerous inquiries from United States Citizens, native and naturalized, interested in learning the requirements for moving to and taking up residence in Canada. Some of them openly expressed discontent with the general condition that presently exists in the United States, such as crime, violence, and unemployment. Others, particularly former natives of Canada, believed that because of the present economic conditions here, they may be able financially to maintain themselves in Canada on their limited retirement income.

We continue to receive full cooperation from the numerous public and private agencies, schools, colleges, etc. The prompt and courteous assistance we receive both from the local United States Immigration and Naturalization Service Office and the District Director's Office in Boston is commendable and has greatly benefited us as well as the people we serve.

WORCESTER OFFICE

We had another banner year providing 5,893 services for a clientele of 3,473. The Agent had an average of 500 services a month from January 31, 1974, after clerical assistant, Miss C. Elizabeth Esposito, retired after forty-three years in the Division's Worcester office. Numerous people called her work "a labor of love", especially the ones that she assisted for decades, dating back to 1930. Her devotion to duty motivated her to such an extent, that she did not use close to 400 sick days. The Division and the public recognized these facts, about a career state employee.

Central Massachusetts has the same trend as mentioned in national publications, how America's melting pot of immigrant cultures has received a big dash of Asian flavoring since 1965 when America's new, liberalized immigration law went into effect. Immigrants from India lead the new wave, along with Korea and the Philippines, being mostly highly skilled and professional people, physicians, psychiatrists, scientists and engineers. We have numerous dealings with them, as well as, the sponsoring hospitals and research institutions, such as, the world renown Worcester Foundation for Experimental Biology.

Another trend is an increase of non-immigrant students from both hemispheres to the Worcester Public School System, since April 1962, when they registered with the United States Immigration and Naturalization Service to accept foreign students. There also has been a marked increase in permanent resident students, especially Spanish speaking.

There are a number of well known higher institutions of learning in the area, which enroll students from all over the world, as well as employing teachers on their staffs. We have inquiries from Assumption College, Becker Junior College, Clark University, Holy Cross College, Worcester Junior College, Worcester Polytechnic Institute, and Worcester State College. Being certified as a teacher in Massachusetts in April 1953, and attending four of the colleges helps this agent in assisting and guiding these students, as well as gaining instant rapport.

FALL RIVER OFFICE

During the past fiscal year ending June 30, 1974, the Fall River Office totaled 5,116 services. These services were issued to 2,158 individuals located in the Southeastern Massachusetts area.

Fifty-four countries were represented by clients seeking assistance at the Fall River Office. The greater number of persons visiting this office were people of Portuguese ethnic background and constituted almost 75% of the work involved at this office. The next ethnic groups were natives and citizens of the Philippines, China and Poland, in that order.

Clients from twenty-six separate localities called at this office for services. There are numerous foreign students in the Southeastern Massachusetts area attending Southeastern Mass. University and Bristol Community College. These students represent the countries of South America, Ceylon, Africa, Egypt and India, from which countries, years ago, there was little or no immigration in this area.

The services most frequently given during the past fiscal year involved questions and answers concerning United States citizenship and requests for information and advice for individuals who are anxious to bring relatives, friends and students to the United States from other countries. Many letters were written on behalf of clients by this office to United States Consulates abroad and to government agencies within this country.

The immigration statistics remain stable, however, there is not the great influx of new arrivals that occurred in the late 1960's and early 1970's.

The bulk of the work during the past fiscal year was that of clients applying for United States citizenship. It is the largest number of citizenship applications forwarded to the Federal Immigration and Naturalization Service at Boston by this District.

It is evident that citizenship and immigration are still important factors in the Fall River area, the Commonwealth as well as the rest of the nation.

LAWRENCE OFFICE

Fiscal year ending June 30, 1974 proved to be the busiest year of the Lawrence office in the memory of this Agent. We gave 8,553 services to 5,235 individuals. This was an increase of 626 services over last year's previous high of 7,827.

The service most frequently rendered dealt with immigration information. With the complexity of our immigration laws, much of our time was spent explaining the various aspects, many of which are incongruous and at times, even absurd. For example, we had a newly arrived resident alien who wanted to bring his wife and his unmarried son and daughter to the United States. The son, twenty-five years of age, was born in Portugal. The daughter, age twenty-three, was born in Brazil, after the family moved there. We advised the gentleman that he could petition for his wife and son, but could not do so for his daughter because she came under the Western Hemisphere numerical limitation. The look of bewilderment that crossed this man's face was something never to be forgotten. We mentioned the possibility of a labor certification for her, but explained that she would first have to be sponsored by an employer who had need for her skills. Then, after the papers were certified by the Labor Department (which happens in only about 50 percent of the applications submitted) there would be a waiting period of over two years before the Consul could even begin processing her papers. The fallacy in this procedure lies in the fact that no employer is going to wait 2½ years for a prospective employee. The man explained sadly that his daughter has lived at home all her life and has never had any work experience. He finally decided to send only for his son, since his wife would not want to leave her daughter alone. Meanwhile, this family is separated and the man and his son are working to support two homes. We read somewhere that our laws are set up to prevent the separation of families!

This Agent has been working in Lowell one day a week. The work in that city increased tremendously during the past year so arrangements were made to increase the Lowell visits by $\frac{1}{2}$ -day. It is hoped that some day a full-time office will be established in Lowell because there is sufficient work there to warrant it.

We have the cooperation of the Federal Agencies, public and private agencies, schools, colleges, and industry as well as individuals from all walks of life and hope to continue to serve them.
